HOW TO IDENTIFY MANUAL TRANSMISSIONS and RELATED PARTS

PARTS DIRECTLY RELATED TO THE OPERATION OF THE TRANSMISSION ASSY., SUCH AS CASE, GEARS, SHAFTS, EXTENSION, ETC., ARE LISTED IN PARTS LISTS SECTIONS FOR EACH BASIC TRANSMISSION TYPE AS INDICATED BELOW.

Description and Type	Catalog Identification	Parts List Section	Years
3 Speed–3.03	3.03	70.3	73/78
4 Speed–German	G/4/S	70.4	74/
4 Speed–Ford	F/4/S	70.5	73
4 Speed – Ford	F/4/s – w O/D	70.5	77/
4 Speed–Ford–(RAD) (BORG–WARNER built)	F/4/S	70.6	79
4 Speed–Capri	C/4/S	70.7	73/78

PARTS NOT DIRECTLY RELATED TO THE TRANSMISSION ASSY., SUCH AS GEARSHIFT OR CLUTCH MECHANISM, ARE LISTED IN SECTION 71.

Each transmission is identified by a number stamped on a metal tag or plate attached to the case. Refer to page 2 of this section for the locations of the identification numbers.

Each basic transmission type is identified by several numbers which reflect the different model years or the significant changes made within the same model year.

A guide listing the transmission identification numbers in numerical and alphabetical sequence appears on page 3 of this section. When the transmission identification number is known, simply refer to this guide for the appropriate transmission type, year, parts list section and illustration section and page number.

Manual transmissions and their related parts can also be identified by year, model, eng., etc. in the Transmission Application Chart starting on page 3 of this section.

Manual Transmission Illustrations are shown in Illustration Sections 70 thru 75 of the Illustrations Catalog, Form FP 8095–B

An Alphabetical Index cross–referencing part name to basic number appears at the beginning of this catalog.

HOW TO IDENTIFY AUTOMATIC TRANSMISSION PARTS

A. USE THE TRANSMISSION IDENTIFICATION TAG

1. Each transmission is identified by a number stamped on a metal tag or plate attached to the case.

2. Refer to page 2 of this section for the illustration showing the location of the identification tag.

3. Each basic transmission type is identified by several numbers which reflect the different model years or the significant changes made within the same model years.

4. Seven basic types of automatic transmissions are used as optional equipment for the 1973/ model year.

DESCRIPTION AND TYPE	CATALOG IDENTIFICATION	PARTS LISTS SECTION
Cruise–O–Matic 3 speed–Model	C/M(FMX)	A70.1
Automatic 3 speed	C4	A70.2
Automatic 3 speed	C6	A70.3
Automatic 3 speed	C3	A70.5
Borg–Warner(Capri)	B/W	A70.4
Borg–Warner(Mercury)	B/W	A70.6
Jacto Automatic	PLA	A70.7

5. How transmission tag information is listed in the catalog.
   a. If the same part is used on all PJD transmissions(PJD–E, PJD–F, PJD–G), the description area of the catalog will show "use with PJD transmission".
   If a different part is used on PJD–E transmission than on PJD–F transmission, the description area of the catalog will restrict each part, i.e. "use with PJD–E transmission", "use with PJD–F transmission" etc.
   b. If the same part is used on PJD–E2 and PJD–E3 transmissions, the description area of the catalog will show "use with PJD–E transmission".
   If a different part is used on PJD–E2 transmission than on PJD–E3 transmission, the description area will restrict each part, i.e. "use with PJD–E2 transmission", "use with PJD–E3 transmission".
   c. If a different part is used on a PJD–E transmission than on the PJD–E2 transmission, the description area of the catalog on the PJD–E part will alert the reader of the existence of the other part, i.e. "use with PJD–E transmission(also see D0AZ 7153–A for PJD–E2 transmission).

B. USE THE APPLICATION CHART

Automatic transmissions and their related parts can also be identified by year, model, engine, etc., in the Transmission Application Chart on page 3 of this section.

C. USE AVAILABLE ILLUSTRATIONS

Automatic transmission illustrations are shown in several sections of the Illustration Catalog, Form FP–8095–B as indicated below.

	ILLUSTRATION SECTION
Transmission assemblies	A70.1 thru A70.6
Transmission oil cooling system and vacuum advance system	A71
Shift control mechanism	A72
Steering column with shift mechanism	A72
Steering column without shift mechanism	35
Transmission kickdown and accelerator linkage mechanisms	97
Console mounted parts related to shift control mechanisms	042

D. HOW TRANSMISSION PARTS ARE CATALOGED

1. Parts directly related to the operation of the transmission assembly, such as, case, extension housing, gear train, etc., are listed in parts lists sections A70.1, A70.2, A70.3, A70.4 and A70.5.
2. Parts not directly, but functionally related to the operation of the transmission assembly, such as, control selector mechanisms, oil cooling systems, etc., are listed in section A71.

MAIN CONTROL IDENTIFICATION CHART

An identification number is stamped at the lower end of the main control assembly. The following chart will provide quick identification of the service part number when the identification number is known. The main control assembly may also be selected by model, year and description under group 7A100 which follows the chart.

MAIN CONTROL BODY IDENTIFICATION	SERVICE PART NUMBER	MAIN CONTROL BODY IDENTIFICATION	SERVICE PART NUMBER

7A100 MAIN CONTROL VALVE BODY ASSY.

MAIN CONTROL IDENTIFICATION CHART

An identification number appears on a metal tag at the lower end of the main control assembly. The following chart will provide quick identification of the service part number when the identification number is known. Also the main control assembly may be selected by model, year and description under group no. 7A100 which follows the chart.

NOTE 1 For A-(Mercury) vehl. with main control #C90-use #HH9 control for service

MAIN CONTROL IDENTIFICATION CHART

An identification number appears on a metal tag at the lower end of the main control assembly. The following chart will provide quick identification of the service part number when the identification number is known. The main control assembly may also be selected by year, model and description under group 7A100 which follows this chart.

IDENTIFICATION	PART NUMBER	IDENTIFICATION	PART NUMBER
#CX	D2AZ 7A100-C	#HJ,HS	D5AZ 7A100-C

RADIATOR CROSS REFERENCE GUIDE

A To use this guide
1. Find the identification marking on radiator top tank or the side mounting bracket.
2. Locate this number in column marked "Identification" .
3. Read across to next column to right to find the service number.

B If the radiator identification is not known, the pages following this guide have radiator part numbers arranged in the following order–
1. Car line 2. Model years 3. Number of cylinders 4. Cubic inch displacement

8260 HOSE (RADIATOR)

GENERAL INFORMATION

Motorcraft numbers as they appear in the model application chart which follows can be used to determine diameter and length of the hose as explained below.

FLEXIBLE RADIATOR HOSE

FIRST LETTER PREFIX: K–Designates the hose line in all cases.

SECOND LETTER PREFIX:
A–Designates 1 1/4" inside diameter at end opening.
B–Designates 1 1/2" inside diameter at end opening.
C–Designates 1 3/4" inside diameter at end opening.
D–Designates 2" inside diameter at end opening.

NUMBERS: (There must always be a three digit numeral.) First two digits designate the amount of full inches of hose length. Third digit designates the remaining fraction of an inch (expressed in eights of an inch) of hose length.

EXAMPLE KAB–194–Flexible radiator hose having a 1 1/4" inside diameter at one end and a 1 1/2" inside diameter at the other end opening and a hose length of 19 1/2" .
KC–092–Flexible radiator hose having a 1 3/4" end opening inside diameter at both ends and a hose length of 9 1/4" .

MOLDED RADIATOR HOSE

FIRST LETTER PREFIX: K–Designates the hose line in all cases.

SECOND and THIRD LETTER PREFIXES:
M–Designates the molded curved type hose.
S–Designates the molded straight type hose.

NUMBERS: Sequential numbering system beginning with the numeral "1" .

EXAMPLE:
KM–174–Motorcraft molded curved radiator hose.
KS–7–Motorcraft molded straight radiator hose.

8A564 SWITCH (COOLANT TEMPERATURE CONTROL VACUUM)–Also refer to groups 9D473 and 12A091

To select the correct coolant temp. switch by knowing the identification number only:

- Check the switch, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the switch identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:

The service part number for switch identified D5AE-A2A, D7DE-A1A, D7DE-A2A, E1AE-J1A, E1AE-J2A is D5AZ 8A564-A.

- Refer to application for other forms of Identification.

8620 BELT (DRIVE)

DRIVE BELTS

HOW TO IDENTIFY FAN BELTS

1. By size and length–the Motorcraft Part Number allows you to determine belt size as explained below.

FIRST LETTER PREFIX: J–Designates the V–belt line in all cases

SECOND LETTER PREFIX:

Designates	Top width of belt	Designates	Top width of belt
A	13/32", 27/64" or 3/8"	G	7/8"
B	15/32"	H	1/4"
C	1/2"	M	19/32"
D	5/8"	P	23/32"
E	11/16"	R	17/32"
F	3/4"	K6	27/32" "V" rib

NUMBERS (There must always be a three digit numeral)
First two digits designate the amount of whole inches of outside circumference of the belt.
Third digit designates the remaining fraction of an inch (expressed in eighths of an inch) of outside circumference of the belt

LETTER SUFFIXES: Suffixes will designate special types of V–belts–
C–For cog belts L–For laminated belts

EXAMPLES *JB–493–L–Laminated belt with 15/32" top width and 49 3/8" outside circumference.
*JF–535–C–Cog belt with 3/4" top width and 53 5/8" outside circumference.

2. By identification marking–refer to following chart
3. By year, model and application–refer to listing beginning on page 5 of this section

BELT IDENTIFICATION MARKING TO SERVICE PART NUMBER GUIDE

The purpose of this guide is to help find service part numbers for fan belts. Belts are identified with a marking on the outer (wide) surface of the belt. Although the identification marking and service part number may be the same in some instances, this is not generally true. Find the belt marking in the "Belt Identification Marking" column, then order the number listed in the "Service Part Number" column. Following the guide chart, belt part numbers are listed by model year to help find service part numbers when the belt marking is not known.

BELT IDENTIFICATION CHART

8620 BELT (DRIVE)

NOTE: Any production belt with numerals in the suffix such as A1A,A2A ect. are the same as the suffix AA.
EXAMPLES: D2VE 8620–L1A,L2A,L3A,L4A belts are the same as D2VE 8620–LA

9D448 ★	VALVE ASSY. (INTEGRAL E.G.R. and BACK PRESSURE-TRANSDUCER)- Also refer to groups 9F452,9D475					

To select the correct EGR valve by knowing the identification number only:

- Check the EGR valve, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the EGR valve identification part number (sequenced numerically) and find the service part number in the adjacent column.

★

For example:

The service part number for EGR valve identified D7AE 9D448-C1A,C2A,C3A is D7AZ 9D448-C.

9D448 VALVE ASSY. (INTEGRAL E.G.R. and BACK PRESSURE-TRANSDUCER) Also refer to group 9F452 and 9D475

HOW TO FIND EGR VALVES

To select the correct EGR valve the following information must be known and utilized–

- Year
- Car line (Mercury, Cougar, Monarch, etc.)
- Engine (4 cyl. 2.3L, 6 cyl. 4.1L–250 C.I.D., 8 cyl. 5.8L–351 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi–altitude, etc.)
- In some cases, more than one service EGR valve may be specified in the catalog based on the above information. In these cases the identification part number shown on the EGR valve is also required.

For example:

If an EGR valve is required for a 1977 Comet with an 8 cylinder 5.0L (302 C.I.D.) engine, automatic transmission, used in Canada and 49 states (except California)–

- Refer to 1977 P (Comet)
- Read down to find "P – – A/T–exc. Calif. 8 (cyl.) 302 (C.I.D.)".

The service part numbers listed for this application are D7DZ 9D448–B and D7DZ 9D448–D. Therefore, to select the correct service part number, the identification part number shown on the EGR valve taken from the vehicle, must be used.

If the EGR identification is D7DE 9D448–B1A, D7DE 9D448–B2A or D7DE 9D448–B3A the service part number is D7DZ 9D448–B. If the EGR identification is D7DE 9D448–D1A, D7DE 9D448–D2A or D7DE 9D448–D3A the service part number is D7DZ 9D448–D.

Also refer to groups 9D448 and 9D475

HOW TO FIND EGR VALVES

To select the correct EGR valve the following information must be known and utilized–

- Year
- Car line (Mercury, Cougar, Monarch, etc.)
- Engine (4 cyl. 2.3L, 6 cyl. 4.1L-250 C.I.D., 8 cyl. 5.8L- 351 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other restrictions (California, hi-altitude, etc.)
- Identification part number shown on EGR valve

For Example

If an EGR valve is required for a 1976 Mercury with an 8 cylinder 6.0L (400 C.I.D.) engine, automatic transmission, used in Canada and 49 states (except California)–

- Refer to 1976 A (Mercury)
- Read down to find "A - - A/T-exc. Calif. 8 (cyl.) 400 (C.I.D.)".

The service part numbers listed for this application are D6AZ 9F452-D and D6AZ 9F452-E. Therefore, to select the correct service part number, the identification part number shown on the EGR valve taken from the vehicle, must be used.

If the EGR identification is D6AE 9F452-DA the service part number is D6AZ 9F452-AB.
If the EGR identification is D6AE 9F452-EA the service part number is D6AZ 9F452-G.

9D473 VALVE ASSY. (EXHAUST GAS RECIRCULATION CONTROL)-Also refer to group 8A564 and 12A091

To select the correct EGR valve by knowing the identification number only:

- Check the EGR valve, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the EGR valve identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:

The service part number for EGR valve identified D3TE-AA, D5ZE-A2A, D7ZE-A1A, D7ZE-A2A or D5DE-B1A is D3TZ 9D473-A.

9D473 VALVE ASSY. (EXHAUST GAS RECIRCULATION CONTROL) — Cont'd

HOW TO FIND EGR VALVES

To select the correct EGR valve the following information must be known and utilized–

- Year
- Car line (Mercury, Cougar, Monarch, etc.)
- Engine (4 cyl. 2.3L, 6 cyl. 4.1L–250 C.I.D., 8 cyl. 5.8L–351 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other restrictions (California, hi-altitude, etc.)
- Identification part number shown on EGR valve

For Example

If an EGR valve is required for a 1979 Monarch with an 6 cylinder 4.1L (250 C.I.D.) engine used in California

- Refer to 1979 G (Monarch)
- Read down to find "G – – Calif. 6 (cyl.) 250 (C.I.D.)".

The service part numbers listed for this application are D8TZ 9D473–B and D30Z 9D473–A. Therefore, to select the correct service part number, the identification part number shown on the EGR valve taken from the vehicle must be used.

If the EGR identification is D8TE–B1A or D8TE–B2A the service part number is D8TZ 9D473–B. If the EGR identification is D30E–A1A, D50E–A2A, D7BE–A1A, D7BE–A2A or D5DE–A1A the service part number is D30Z 9D473–A.

9D475 VALVE ASSY. (EXHAUST GAS RECIRCULATION)-Also refer to groups 9D448 and 9F452

To select the correct EGR valve by knowing the identification number only:

- Check the EGR valve, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the EGR valve identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:

The service part number for EGR valve identified D3VE 9D475-AA is D3VY 9D475-A.

9D475 VALVE ASSY. (EXHAUST GAS RECIRCULATION)

HOW TO FIND EGR VALVES

To select the correct EGR valve the following information must be known and utilized–

- Year
- Car line (Mercury, Cougar, Comet, etc.)
- Engine (4 cyl. 2.3L, 6 cyl. 4.1L–250 C.I.D., 8 cyl. 5.8L–351 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other restrictions (California, hi–altitude, etc.)
- Identification part number shown on EGR valve (identification part numbers not shown are no longer serviced)

For Example

If an EGR valve is required for a 1975 Mercury with an 8 cylinder 7.5L (460 C.I.D.) engine, automatic transmission, used in California.

- Refer to 1975 A (Mercury)
- Read down to find "A – – Calif. 8 (cyl.) 460 (C.I.D.)".

The service part numbers listed for this application are D5VY 9D475–C and D5VY 9D475–E. Therefore, to select the correct service part number, the identification part number shown on the EGR valve taken from the vehicle, must be used.

If the EGR identification is D5VE 9D475–C1A, the service part number is D5VY 9D475–C. If the EGR identification is D5VE 9D475–EA, D5VE 9D475–F1A or D5VE 9D475–F2A the service part number is D5VY 9D475–E.

9J500–9509 Refer to group 9510 for Carburetor Parts List Instructions

9510 CARBURETOR ASSY.

HOW TO IDENTIFY CARBURETORS and RELATED PARTS

To facilitate the identification of service kits and parts for a specific carburetor, parts lists or bills of material are provided in Sections 95.23 and up, of this catalog for each carburetor assembly. It is necessary first to identify the carburetor assembly per the instructions that follow.

Carburetors can be identified by the stamping number shown on the carburetor or on a metal tag attached to the carburetor.

Each carburetor for 1973/ models has an identification tag. An illustration and explanation of the carburetor identification tags are shown on Page 2 of this section.

If either the tag or stamping identification number is known, the related carburetor and carburetor parts list numbers can be determined from the Chart beginning on Page 2 of this section.

Carburetors and their parts lists can also be identified by Engine, Model Year, etc. in the Carburetor Application Chart beginning on Page 33 of this section. Also shown in the Carburetor Application Chart is the page number for a typical parts illustration for each carburetor assembly.

Carburetor illustrations are shown in Illustration Section 95 of Form FP–8095–B.

Parts lists are grouped by type and engine and each group of related carburetor parts lists is shown in a separate section. The section number can readily be identified with the carburetor parts list numbers as shown in the following example;

Carburetor Type	Engine No. of Cyls.	Engine C.I.D.	Parts List Number	Catalog Section No.
Carter 1/B	6	200	23A,23B,etc.	95.23
Ford 2/B	8	302	24A,24B,etc.	95.24
Ford 4/B	8	429	27A,27B,etc.	95.27

For ready reference, kit part numbers are shown with the carburetor identification chart and at the beginning of each parts list section. A listing of components for each kit is shown in Section 95A. Refer to the Index at the beginning of Section 95A for page number of service kit.

Carburetor attaching parts are shown at the beginning of their respective parts lists following the part numbers for the kits.

To identify the parts or kits for a specific carburetor it is only necessary to refer to the related parts list and parts illustration.

An Alphabetical Index showing a cross–reference between noun description and basic group number is located at the beginning of this catalog.

IMPORTANT: ALWAYS FURNISH APPROPRIATE PATENT PLATE INFORMATION and DSO NUMBER IF APPLICABLE WHEN ORDERING PARTS NOT LISTED IN THE CATALOG

9510 CARBURETOR ASSY.

HOW TO FIND CARBURETORS

To select the correct carburetor the following information must be known and utilized–

- Year
- Car line (Mercury, Capri, Lincoln, etc.)
- Engine (4 cyl. 2.3L, 6 cyl. 4.1L–250 C.I.D., 8 cyl. 5.8L–351 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi–altitude, etc.)
- In some cases, more than one service carburetor may be specified in the catalog based on the above information. In these cases the identification part number shown on the carburetor is also required.

For example:

If a carburetor is required for a 1973 Capri with a 4 cylinder 2.0L (122 C.I.D.) engine, manual transmission.

- Refer to 1973 J (Capri)
- Read down to find "J – – M/T–4 (cyl.) 122 (C.I.D.)".

The service part numbers listed for this application are D2RY 9510–D and D3RY 9510–C. Therefore, to select the correct service part number, the identification part number shown on the carburetor taken from the vehicle, must be used.

If the carburetor identification is 72HF–DA, the service part number is D2RY 9510–D
If the carburetor identification is 73HF–AA, 73HF–BA or 73HF–LA, the service part number is D3RY 9510–C.

LINCOLN-MERCURY CARS

Instructions for identifying Carburetor Assemblies and their related Parts Lists Numbers are shown at the beginning of Section 95.

For ready reference, kit part numbers are shown at the beginning of each parts list in Section 95.23 and up.

Included in Section 95A is a listing of components for each kit.

Parts Lists for new kits will be added at the end of this section, irrespective of part number.

Always refer to the following Index for page numbers on which components are listed.

9600 CLEANER ASSY. (CARBURETOR AIR)

To select the correct Air Cleaner by knowing the identification number only:

- Check the Air Cleaner, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the Air Cleaner identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:
The service part number for Air Cleaner Assy. identified D30F 9600-AB is D30Z 9600-A.

9600 CLEANER ASSY. (CARBURETOR AIR) — Cont'd

HOW TO FIND AN AIR CLEANER ASSY.

To select the correct Air Cleaner the following information must be known and utilized–

- Year
- Car line (Mercury, Capri, Lincoln, Etc.)
- Engine (4 cyl. 2.3L, 6 cyl. 4.1L–250 C.I.D., 8 CYL. 5.8L–351 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi–altitude, etc.)
- In some cases, more than one service Air Cleaner may be specified in the catalog based on the above information. In these cases the identification part number shown on the Air Cleaner is also required

For example:

If an Air Cleaner is required for a 1976 Bobcat with a 6 cylinder 2.8L (171 C.I.D.) engine

- Refer to 1976 L (Bobcat)
- Read down to find L 6(cyl.) 171(C.I.D.)".

The service part numbers listed for this application are D6ZZ 9600–A and D6ZZ 9600–B. Therefore, to select the correct service part number, the identification part number shown on the Air Cleaner taken from the vehicle, must be used.

If the Air Cleaner identification is D6ZF 9600–AA the service part number is D6ZZ 9600–A. If the Air Cleaner identification is D6ZF 9600–AB the service part number is D6ZZ 9600–B.

Alternator mounting parts are listed in chart form following the illustration below. Refer to the illustration to determine the name of the part required. Refer to the chart to select the appropriate part number. The chart is listed by year, model, engine and alternator make and amperage. Attaching parts such as bolts, nuts, etc. are listed by code number. A listing of the code numbers and their corresponding part numbers and descriptions appears at the end of the chart.

HOW TO FIND ALTERNATORS AND COMPONENTS

By IDENTIFICATION:

1. Refer to Identification Chart below.
2. Check marking (on alternator housing) against Identification numbers to determine part numbers of service alternator, pulley, fan and spacer.

By MODEL APPLICATION

1. Refer to Model Application Chart beginning on page 32.
2. Refer to appropriate Year, Model, and Engine.

3. Select and refer to appropriate Parts List Section and Number.
4. If basic number is not known refer to Illustration Page shown, or to the Index following the General Information Section of this Catalog.
5. Select part number shown for affected Parts List. If more than one part number is shown refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A, B, or C etc. The appropriate parts list suffix A,B,C etc. is shown in the quantity required column when the quantity is one (1).
7. Parts are listed numerically.

IDENTIFICATION EXAMPLE: D2DF 10300-AC is listed in Parts List Section 103.1 Column E.
MODEL APPLICATION EXAMPLE: 1973 Montego (8 cyl.) uses 61 amp. alternator (D2TZ 10346-B). Internal parts of this alternator are listed in Parts List Section 103.1,

10732 **BATTERY MOUNTING PARTS**

Battery mounting parts are listed in chart form following the illustration below. Refer to the illustration to determine the name of the part required. Refer to the chart to select appropriate part number. The chart is listed by year, model and amperage of battery.

Attaching parts such as bolts, nuts, etc., are listed by code number. A listing of the code numbers and their corresponding part numbers and descriptions appears at the end of the chart.

11001–2 STARTER MOTOR

HOW TO FIND STARTERS and COMPONENTS

By IDENTIFICATION:

1. Refer to Identification Chart below
2. Check marking (on starter housing) against identification numbers

By MODEL APPLICATION:

1. Refer to Model Application Chart beginning on next page
2. Refer to appropriate Year, Model and Engine

3. Select and refer to appropriate Parts List Section and Number
4. If basic number is not known refer to Illustration Page shown, or to the Alphabetical Index.
5. Select part number shown for affected Parts List. If more than one part number is shown refer to Description and Restrictions for clarification
6. Quantity of parts shown in columns A, B or C etc. The appropriate parts list suffix A,B,C etc. is shown on the quantity required column when the quantity is one (1).
7. Parts are listed numerically

Identification Example — D2AF 11001–DA is listed in Parts List Section 110.1, Column 1A

Model Application Example — 1973 Montego (8 cyl.) uses starter C5TZ 11002–D, Internal parts for this starter are listed in Parts List Section 110.1, Column 1A

12A091 VALVE ASSY. (DISTRIBUTOR VACUUM CONTROL)–Also refer to groups 8A564 and 9D473

To select the correct vacuum control valve by knowing the identification number only:

- Check the vacuum control valve, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the vacuum control valve identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:

The service part number for vacuum control valve identified D3AE–BA is D3AZ 12A091–B.

IDENTIFICATION CHART

TYPE	IDENTIFICATION	SERVICE PART NUMBER	COLOR	TYPE	IDENTIFICATION	SERVICE PART NUMBER	COLOR

12A091 VALVE ASSY. (DISTRIBUTOR VACUUM CONTROL)—Also refer to groups 8A564 and 9D473

HOW TO FIND VACUUM CONTROL VALVES

To select the correct VACUUM CONTROL valve the following information must be known and utilized–

- Year
- Car line (Mercury, Capri, Lincoln, etc.)
- Engine (4 cyl. 2.3L, 6 cyl. 4.1L–250 C.I.D., 8 cyl. 5.8L–351 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi–altitude, etc.)
- In some cases, more than one service VACUUM CONTROL valve may be specified in the catalog based on the above information. In these cases the identification part number shown on the VACUUM CONTROL valve is also required.

For example:

If a VACUUM CONTROL valve is required for a 1975 Lincoln with an 8 cylinder 7.5L (460 C.I.D.) engine–

- Refer to 1975 D (Lincoln)
- Read down to find "D 8 (cyl.) 460 (C.I.D.)".

The service part numbers listed for this application are D3OZ 12A091–A and D3AZ 12A091–A. Therefore, to select the correct service part number, the identification part number shown on the VACUUM CONTROL valve taken from the vehicle, must be used.

If the VACUUM CONTROL valve identification is D3OE–AA the service part number is D3OZ 12A091–A. If the VACUUM CONTROL valve identification is D3AE–AA the service part number is D3AZ 12A091–A

12127 DISTRIBUTOR ASSY.

HOW TO FIND DISTRIBUTOR and COMPONENTS

To find Distributor (other than Calibration) Parts:
(Calibration Parts are listed by Code Number on Page 24 and 25 of this section)

By IDENTIFICATION:

1. Refer to Identification Chart below.
2. Check marking (located on top side of distributor housing) against identification numbers.

By MODEL APPLICATION:

1. Refer to Model Application Chart beginning on page 26 of this section
2. Refer to appropriate Engine, Year and Model.

3. Select and refer to appropriate Parts List Section and Number.
4. If group number is not known refer to illustration page shown or the Alphabetical Index which follows the General Information Section of this catalog.
5. Select part number shown from appropriate Parts List. If more than one part number is shown, refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A,B,C etc.
7. Part numbers are listed numerically.

IDENTIFICATION EXAMPLE: D3AF 12127-AA is listed in Parts List Section 120.2, Column B. Calibration parts are listed by code number on page 24 and 25 of this section. (Cam-group 12210, Springs-group 12191-2 and Diaphragm-group 12370) are listed by Code Number, etc.

MODEL APPLICATION EXAMPLE: For an 8 cyl. 351 engine on a 1973 Montego use distributor D3AZ 12127-A (identified D3AF 12127-AA). Internal parts for this distributor are listed in Parts List Section 120.2, Column B.
