CALIBRATION PARTS CHART

HOW TO FIND DISTRIBUTOR CALIBRATION PARTS

(Diaphragm Assy., Primary, Secondary, Vacuum Springs, Cam, Sleeve & Plate Assy.)

You must know the Distributor Identification Number–

1. Refer to Identification Chart beginning on page 19 of this section.
2. Check distributor for marking or identification number and locate same in chart.
3. Find Calibration parts listed by code number in adjacent columns.
4. Refer to Calibration Code and Part Number Cross Reference listed below for appropriate part number.

Example– Calibration parts for Distributor identified D3AF 12127–AA are–
PRIMARY SPRING–204–C5AZ 12192–D,SECONDARY SPRING–204–C5AZ 12192–D
CAM–101–C5AZ 12210–A and DIAPHRAGM ASSY.–309–D2TZ 12370–J

12127 DISTRIBUTOR ASSY. — Cont'd

APPLICATION CHART

HOW TO FIND A DISTRIBUTOR ASSY.

To select the correct DISTRIBUTOR the following information must be known and utilized–

- Year
- Car line (Mercury, Capri, Lincoln, etc.)
- Engine (4 cyl. 2.3L, 6 cyl. 4.1L–250 C.I.D., 8 cyl. 5.8L–351 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi–altitude, etc.)
- In some cases, more than one service DISTRIBUTOR may be specified in the catalog based on the above information. In these cases the identification part number shown on the DISTRIBUTOR ASSY. is also required

For example:
If a DISTRIBUTOR ASSY. is required for a 1974 Capri with a 6 cylinder 2.8L (171 C.I.D.) engine, automatic transmission–

- Refer to 1974 J (CAPRI)
- Read down to fine "J – – A/T 6(cyl.) 171 (C.I.D.)".

The service part numbers listed for this application are D4RY 12127–J and D4ZZ 12127–M. Therefore, to select the correct service part number, the identification part number shown on the DISTRIBUTOR taken from the vehicle, must be used.

If the DISTRIBUTOR identification is 74TF 12100–RA, the service part number is D4RY 12127–J. If the DISTRIBUTOR identification is 74TF 12100–MA the service part number is D4ZZ 12127–M.

Determine engine (number of cylinder and C.I.D.), year, model and/or identification. Find service Distributor as well as Cap, Condenser, Points, Repair kit and Rotor in adjacent columns.

(Also see pages 19 thru 23 of this section for Parts Lists instructions and DISTRIBUTOR IDENTIFICATION CHART)

12405 SPARK PLUG ASSY. — Cont'd

NOTE: IMPORTANT

"Canadian regulations require that vehicles and other devices (other than aircraft) equipped with internal combustion engines using spark ignition systems and manufactured in or imported into Canada on or after September 1, 1976 be operated in conformance with restrictions on radio frequency interference. Use of non–resistor or non–inclusive type spark plugs may cause such vehicles or devices to be out of compliance with these regulations."

WIRING LOOM MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Loom Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same 2
Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Loom Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the loom identification or tag number is not known.

14290 WIRE ASSY. (DASH PANEL TO HEADLAMP JUNCTION)

WIRING LOOM MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Loom Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same as the Loom Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Loom Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the loom identification or tag number is not known.

14300 CABLE ASSY. (BATTERY UNIVERSAL TYPE)

P-9098

IDENTIFICATION CHART

Battery cable terminals(battery end)are universal and may be used on either the positive or negative battery post. Battery cable length is determined by distance between hole centers.

14305 WIRING ASSY. (ALTERNATOR TO VOLTAGE REGULATOR)

WIRING LOOM MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Loom Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same as the Loom Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Loom Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the loom identification marking or tag number is not known.

WIRING LOOM MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Loom Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same as the Loom Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Loom Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the loom identification or tag number is not known.

WIRING LOOM, MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Loom Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same as the Loom Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when Service Wiring differs from the Loom Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed –0.005 2
chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the loom identification marking or tag number is not known.

14405 WIRING ASSY. (REAR LAMP)

WIRING MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same as the Wiring Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when Service Wiring differs from the Wiring Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the loom identification marking or tag number is not known.

WIRING LOOM MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Loom Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same as the Loom Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Loom Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the loom identification marking or tag number is not known.

14632-3 WIRING (REAR DOOR WINDOW REGULATOR)

WIRING LOOM MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Loom Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same as the Loom Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Loom Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the loom identification marking or tag number is not known.

17260 CABLE ASSY. (SPEEDOMETER)

There are two ways of selecting Speedometer Cables
(1) By identification
(2) By Model Application

BY IDENTIFICATION

When the Identification Number of the speedometer cable is known

1. Refer to Identification Chart below
2. Find the Identification Number and the corresponding Service Number

BY MODEL APPLICATION

1. Refer to Model Application Chart beginning on page 6
2. Refer to appropriate Model, Year and, Transmission to find Service Part Number

IDENTIFICATION CHART

17271 SPEEDOMETER GEARS (DRIVE and/or DRIVEN)

HOW TO FIND SPEEDOMETER DRIVE and DRIVEN GEAR PART NUMBERS

There are two ways of determining the part number of a speedometer drive or driven gear.

BY IDENTIFICATION or BY APPLICATION

BY IDENTIFICATION

YOU MUST KNOW–
- Physical shape
- Material
- Color
- Number of teeth
- Size (17285 only)
- Identification number–if applicable (17271 only)

EXAMPLE

DRIVEN GEAR (17271)

Physical shape conforms to–
- TYPE–3A
- MATERIAL–Nylon
- COLOR–Red
- NUMBER OR TEETH–21
- PART NUMBER listed is–C4OZ 17271–A

DRIVE GEAR (17285)

Physical shape conforms to–
- TYPE–4A
- MATERIAL–Nylon
- COLOR–Brown
- NUMBER OF TEETH–8
- SIZE–1 3/8" I.D. x 2 1/64" O.D. x 11/16" thick or long
- PART NUMBER listed is–C8OZ 17285–B

BY APPLICATION

YOU MUST KNOW–
- Year
- Rear axle Ratio
- Engine
- Transmission
- Tire Size

EXAMPLE

YEAR–	1973
REAR AXLE RATIO–	3.25 to 1
ENGINE–	8 cyl. 302 C.I.D.
TRANSMISSION–	3 speed manual (3/M/T)
TIRE SIZE	7.35 x 14

DRIVE GEAR part number listed is C8OZ 17285–B

DRIVEN GEAR part number listed is C4OZ 17271–A (for both regular vehicles and Police, Taxi and Rental vehicles).

18124-5 SHOCK ABSORBER IDENTIFICATION CHART

The production number is stamped on the barrel of each shock absorber as an identification marking. The following chart will provide quick identification of the service kit number when the identification marking is known. Also shock absorber kits may be selected by model, year and description under group number 18124-5 which follows the chart. Shock absorber kits include insulators, bolts, nuts and washers.

In those instances where both Ford and Motorcraft numbers are listed, Canadian dealers are to order Motorcraft numbers only.

19C705-8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS

GENERAL INFORMATION

To simplify part number determination and complexity and to reduce look-up time for air conditioning hoses the following summary describes the various service methods:

1. Hose originally used in production is serviced.

Example: Original production part number D3AH 19835-AA is supplied for service as part number D3AZ 19835-A as shown on page 13 of the IDENTIFICATION CHART and on page 8 of the APPLICATION CHART.

2. Hose originally used in production is not supplied for service and has been replaced by detail parts i.e. bulk hose (which must be cut to length) and assorted fittings.

Detail parts include:
Push-on type tube fittings (includes clamps and "o" rings) and bulk hose. Original production hose assemblies are fabricated from bulk hose (cut to length indicated) and add necessary fittings (listed by code number and cross-referenced to part number on pages 16 through 21).

Example: Original production part number D0DA 19867-E is replaced by 41 inches of 1/2" I.D. bulk hose (part number D2AZ 19C708-C) and one each of fitting code J55 which cross-references to fitting service part number D2AZ 19D695-AK and fitting code M55 which cross-references to fitting service part number D2AZ 19D695-U. The original production part number D0DA 19867-E is shown on page 14 of the IDENTIFICATION CHART and on page 10 of the APPLICATION CHART. The fitting code number to part number CROSS-REFERENCE CHART is shown on pages 21 through 23.

Air Conditioning hose information is listed as follows:

	PAGE
APPLICATION CHART	6 through 11
FITTING CROSS-REFERENCE CHART	15 through 23
IDENTIFICATION CHART	12 through 14
INSTALLATION INSTRUCTIONS	2 through 4
SIMPLIFIED HOSE ASSEMBLIES	5

More detailed instructions are included with the IDENTIFICATION CHART, APPLICATION CHART and FITTING CROSS-REFERENCE CHART.

INSTALLATION INSTRUCTIONS

HOSE GUARDS

FOAM RUBBER SLEEVE: To protect 5/8" rubber air conditioner hose from direct rubbing against other parts and to reduce noise vibration noise.

ALUMINUM SLEEVE: To protect 13/32" discharge hose where hose contacts sharp edges in routing through the radiator side support.

1. Slide sleeve on hose before installing end fittings.
NOTE: Sleeve can be cut lengthwise and formed around other hose sizes.

2. Use COAZ 19552-A or 8A 19552-B adhesive to secure sleeve in desired position.

19C705-8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS — Cont'd

INSTALLATION INSTRUCTIONS — Cont'd

DETAIL PARTS and HOSE ASSEMBLIES

1. Note defective hose routing before removal.

2. Repair existing rubber or nylon hose on vehicle if feasible.

   a. Repair cuts and similar failures, in otherwise sound existing hose assemblies, by using one push—on hose splicer or two splicers with the required length of bulk hose.

   b. Repair accumulator hose assemblies (Suction Line—Group Number 19C836) starting in 1973 on some models with integral A/C, by cutting the existing hose (6) inches from one or both coupled ends of the accumulator can, and splicing on the required bulk rubber hose and component fittings to replace the defective hose end.

      If the accumulator can is damaged, or if the existing hose is judged unsound, the entire accumulator assembly must be replaced with component parts.

3. Remove defective hose if splicing is not acceptable.

   a. Discharge the system if not completely discharged, following the procedure outlined in the shop manual.

   b. For those liquid lines (5/16" I.D.) having a self—sealing, quick disconnect coupling on one end, the coupling should be left on the vehicle. The new hose assembly will adapt into this coupling with 1/2"—20 male thread and an external o—ring seal.

4. Assemble the new hose as shown below if component parts are used.

P-9309

a. Select proper end fittings, splicers, hose guards and hose size required to replace the original hose assembly. A visual comparison is required for applications not listed.

b. Cut hose to required length. Keep ends square and remove loose fragments.

c. Lubricate barbed end of fittings and splicers with a few drops of clean refrigerant oil.

P-9310

d. Slide loose clamps on hose, force fittings into hose (by hand) with rotating motion. CAUTION: Do not go past shoulder or scratch fitting with tools, this fitting must be inserted by hand.

e. Position clamp so that spacer tab is over end or rubber hose and tighten until clamp starts to cut hose. (Tighten to 35—40 in. lbs. torque)

INSTALLATION INSTRUCTIONS — Cont'd

DETAIL PARTS and HOSE ASSEMBLIES — Cont'd

f. For nylon hose splicers only, position clamp approx. 1/8" from end of hose (tighten to 40–45 in. lbs. torque).

5. Route the new hose, using the original installation as a guide.
If simplified hose with aluminum tubing and splicer is used, bend the tubing as outlined below:

a. Bend the aluminum tubing by hand to replace the bends of the original hose, making the bends as simple as possible.
b. Drill new holes through the radiator support and side shield as required to make the installations using simplified tube bends.

6. Install and torque new hose assembly.
NOTE: When installing assembly, tighten coupling nut finger tight, then torque per chart below using a backup tube wrench. Further tightening may distort fitting and result in an imperfect seal. Be sure that o–ring is in place on o–ring type fittings. Hoses must be installed with no twist in them.

Fitting Size or Description	Thread Size	RECOMMENDED TORQUE (IN FT. LBS.) O–Ring Type	Flare Type
3/8"	5/8"–18	11–13	15–19
1/2"	3/4"–16 or 18	15–20	21–27
5/8"	7/8"–14 or 18	21–27	25–31
3/4"	1 1/16"–14 or 18	28–33	33–40
Adapter for Self–sealing Coupling	1/2"–20	8–12	
	7/8"–20	21–27	
Compressor fitting and service valve	1"–14	20–40	
Block fitting plate bolt		20–30	
Pressure relief valve (into block fitting)	3/8"–24	4–11	

7. Rework the existing hose support clamps if required.

a. Check for correct installation and proper routing for clearance with other vehicle components.

b. Evacuate, charge and leak test the system following the procedure outlined in the vehicle shop manual.

APPLICATION CHART

To determine the correct hose part number or detail part numbers you must know:

1. Carline–Mercury (A), Montego (C), etc.
2. Year (1973)
3. Hose function (Discharge Line, Liquid Line or Suction Line)
4. Type of Air Conditioning System (Hang–on or Integral)
5. Engine (number of cylinders and cubic inch displacement)

Example No. 1. If a Discharge Line is required for a 1973 Montego (C) with hang–on air conditioning the Application Chart (page 7) indicates (1) that the hose assembly is serviced as part number D1AZ 19972–B (original production hose) and (2) that the hose may be fabricated from 16" of 13/32" I.D. bulk hose (part number D2AZ 19C708–B); one piece of Fitting Code A44 (part number D2AZ 19D695–E) and one piece of Fitting Code CL6 (part number D0TZ 19B679–A).

Example No. 2 If a Liquid Line is required for a 1973 Mercury (A) with hang–on air conditioning the Application Chart (page 8) indicates (1) that the hose assembly is serviced as either part number D1AZ 19837–A (original production hose) or part number C70Z 19837–A (simplified hose) and (2) that the hose may be fabricated from 82" of 5/16" I.D. bulk hose (part number D2AZ 19C708–A), one piece of Fitting Code A33 (part number D2AZ 19D695–D), one piece of Fitting Code C33 (part number D2AZ 19D695–M) and one piece of Fitting Code SG3 (part number D2AZ 19D695–BK).

Example No. 3 If a Suction Line is required for a 1973 Cougar (F) with hang–on air conditioning the Application Chart (page 10) indicates (1) that the hose assembly is serviced as D1AZ 19867–A (original production hose) and (2) that the hose may be fabricated from 71" of 13/32" I.D. bulk hose (part number D2AZ 19C708–B), one piece of Fitting Code B54 (part number D2AZ 19D695–AU) and one piece of Fitting Code CL6 (part number D0TZ 19B679–A).

IDENTIFICATION CHART

To determine the correct hose part number or detail part numbers you must either:

1. Know the identification number from the existing hose.

or

2. Visually identify the existing hose and select appropriate details from the Fitting Cross-Reference Chart shown on pages 16 through 24.

Example No. 1 If the identification number is D2SA 19972-DF, the Identification Chart (on page 15) indicates (1) that the service assembly number is D2SZ 19972-A and (2) that the hose may be fabricated from 18" of 13/32" I.D. bulk hose (part number D2AZ 19C708-B), one piece of Fitting Code P44 (part number D2AZ 19D695-BC and one piece of Fitting Code X4 (part number D2AZ 19D695-BG.

Example No. 2 If the combined identification numbers are D1ZA 19835-AB and D1ZA 19837-AD the Identification Chart (on page 13) indicates (1) that the service assembly (for the combined hoses) is C8OZ 19837-A and (2) that the combined hoses may be fabricated from-78" of 5/16" I.D. bulk hose (part number D2AZ 19C708-A), one piece of Fitting Code H33 (part number D2AZ 19D695-AE), one piece of Fitting Code L33 (part number D2AZ 19D695-R) and one piece of Fitting Code SG3 (part number D2AZ 19D695-BK).

Example No. 3. If the Identification number is DODA 19867-E, the Identification Chart (on page 14) indicates the hose assembly is not serviced (★) and that the hose must be fabricated from-41" of 1/2" I.D. bulk hose (part number D2AZ 19C708-C), one piece of Fitting Code J55 (part number D2AZ 19D695-AK) and one piece of Fitting Code M55 (part number D2AZ 19D695-U).

FITTING CROSS-REFERENCE CHART

There are three ways of selecting hose and fitting part numbers.

1. From Code Number (shown in the Identification or Application Charts) to the Part Number listed below.
2. From a visual inspection of the existing hose and selection of appropriate details using the following instructions:
   a. Determine Fitting Size.
   Diameter of tube at a point behind the nut indicates fitting size, e.g. 3/8" ,1/2" ,5/8" or 3/4".
   Select Fittings and Splicers from the illustrations and text that follows. The necessary Clamps and o-rings are included with all Fittings and Splicers and are also supplied for service as separate parts.

FITTINGS

Determine Fitting size from the information shown below.

ORIGINAL TUBE O.D.	FRACTIONAL FITTING SIZE	INDUSTRY SIZE NO.	THREAD SIZE: SAE 45° FLARE O-RING FEMALE O-RING (MALE FLARE)	THREAD SIZE: O-RING (MALE SWIVEL)
5/16"	3/8"	6	5/8"-18	5/8"-18
13/32"	1/2"	8	3/4"-16	3/4"-18
1/2"	5/8"	10	7/8"-14	7/8"-18
5/8"	3/4"	12	1 1/16"-14	1 1/16"-16

   b. Determine Hose Size.
   Measure end of tube (not barbs). The tube O.D. matches the I.D. of the required hose.
   e.g. tube O.D. is 5/16" and hose I.D. is 5/16" (size No. 6, part number D2AZ 19C708-A).

BULK RUBBER HOSE

Select the appropriate Hose from the sizes listed below:

ORIGINAL TUBE O.D.	REPLACEMENT HOSE I.D.	INDUSTRY SIZE NO.	PART NUMBER	MOTORCRAFT NUMBER
5/16"	5/16"	6	D2AZ 19C708-A(15')	*YF-248
			D4AZ 19C708-A(50')	*YF-599
13/32"	13/32"	8	D2AZ 19C708-B(15')	*YF-249
			D4AZ 19C708-B(50')	*YF-600
1/2"	1/2"	10	D2AZ 19C708-C(15')	*YF-250
			D4AZ 19C708-C(50')	*YF-601
5/8"	5/8"	12	D2AZ 19C708-D(15')	*YF-251
			D4AZ 19C708-D(50')	*YF-602

3. The alphabetical characters of the fitting code number can be used for physical identification by referring to the illustrated fittings shown by type on pages 18 thru 20.
   Examples:

   (A) 44 (part number D2AZ 19D695-E)
   Shown on page

   (SG) 3 (Part number D2AZ 19D695-BK)
   Shown on page

BODY BOLT CHART

HOW TO FIND BOLTS and RELATED PARTS

1) To determine Body Bolts and Related Parts you must know

a) YEAR
b) CAR LINE
c) BODY TYPE
d) BODY BOLT LOCATION
e) NAME OF PART

2) Using this information and the typical illustration shown on page 8. refer to the charts beginning on page 8.

3) Locate the appropriate Code Number for Bolts, Nuts, Retainer etc.

4) Translate the Code Number into a Service Part Number by referring to the Cross Reference listing beginning on page 20.

Read down to locate Code Number.

Read across to locate Service Part Number.

EXAMPLE

a) Year	1973
b) Car Line	MERCURY
c) Body Type	53,57,65
d) Body Bolt Location	Number 10
e) Name of Part	Absorber, Bolt, Flat washer, Lockwasher, Retainer, Shim and Spacer

Code Numbers listed are		Parts numbers shown for these Codes are
Absorber	11	D3AZ 6500154-A
Absorber/retainer	12	D3AZ 6500396-A
Bolt	133	D7AZ 7100394-A
Lockwasher	4	★384294-S
Retainer	18	C8AZ 6200163-A
Shim	32	C9AZ 6200145-A

INSTRUCTIONS

Determine correct Group Number by referring to an appropriate illustration in the Interior Trim Illustration Section or to the Soft Trim Index. Identify Model, Year, Body Type and Trim Code by referring to the sample Certification Label shown and refer to the General Information Section for a complete listing of Series and Body Type Codes.

"BEFORE 10/6/78"

SERIES CODES: (EXCEPT CAPRI)
THE THIRD AND FOURTH DIGITS OF THE VEHICLE IDENTIFICATION NUMBER IDENTIFY THE BODY SERIES.

BODY TYPE CODES: (EXCEPT CAPRI)
THIS CODE APPEARS BELOW "BODY" AND IDENTIFIES THE BODY TYPE OF THE UNIT.

VINYL ROOF CODES (1975/79 ONLY)-EXCEPT CAPRI
THE THIRD AND FOURTH POSITIONS OF THE COLOR CODE INDICATE THE ROOF STYLE AND TYPE OF GRAIN (THIRD POSITION) AND THE COLOR (FOURTH POSITION).

"FROM 10/6/78"

SERIES CODES;

THE THIRD AND FOURTH DIGITS OF THE VEHICLE IDENTIFICATION NUMBER IDENTIFY THE BODY SERIES.

BODY TYPE CODES;

THIS CODE APPEARS BELOW "BODY" AND IDENTIFIES THE BODY TYPE OF THE UNIT.

VINYL ROOF CODES (1979 ONLY);

THIS CODE APPEARS BELOW "VR" AND IDENTIFIES THE VINYL ROOF OF THIS UNIT. THE FIRST POSITION IDENTIFIES TYPE OF GRAIN. THE SECOND POSITION IDENTIFIES COLOR.

TRIM CODES: (EXCEPT CAPRI)
THE CODE SHOWN BELOW "TRIM" IDENTIFIES THE COLOR AND TYPE OF MATERIALS USED IN THE INTERIOR UPHOLSTERY AS WELL AS THE COLOR OF THE INTERIOR PAINT.

BODY TYPE CODES: (CAPRI)
THE FIRST AND SECOND DIGITS UNDER "TYP/TYPE" IDENTIFY BODY TYPE OF THE UNIT.

TRIM CODES: (CAPRI)
THE CODE SHOWN BELOW "POLST/TRIM" IDENTIFIES THE COLOR AND TYPE OF MATERIALS USED IN THE INTERIOR UPHOLSTERY AS WELL AS THE COLOR OF THE INTERIOR PAINT.

For your convenience the Soft Trim Sections are arranged according to year and car line. For example, each year (1973, 1974, 1975, 1976 etc.) is sequenced according to catalog model code, i.e., A (Mercury), C (Montego), D (Lincoln), etc., and each section contains all applicable Soft Trim Parts.

Soft Trim Section consists: (1) Trim Scheme Codes. (2) Swatches (1973/74). (3) Vinyl Roof Cover Codes (1975/ only). (4) Listing of Soft Trim Parts.

IMPORTANT

THE SOFT TRIM SECTION INCLUDES ONLY THOSE ITEMS WHICH WERE AVAILABLE FOR SERVICE AT THE TIME OF PRINTING. ITEMS NOT SHOWN IN THE CATALOG MUST BE IMPROVISED OR PROCURED LOCALLY.

TRIM SCHEME CODES

Consists of: (1) Listing of Trim Scheme Code arranged in alphabetical order for each model, i.e. Mercury Section (A), Montego Section (C), etc.
(2) Description of Trim Schemes.
(3) Color Swatches identified by a number beside the swatch (1973/74).
(4) Type of Seat indicated (1975/).

How to use for 1973/74: (1) Identify Model, Body Type and Trim Code and apply this information to listing of Trim Scheme Codes. (2) Determine Swatch Identification Numbers and refer to Colored Swatches on Page B, etc. (3) Locate appropriate swatches to verify the color and/or pattern of the principle materials used in the unit.
Colored Swatch pages are primarily for verification of color and/or pattern and do not indicate the type or weight of material.

For example:
To determine which Swatches make up Trim Code CB on a 1974 Mercury Four Door Pillared Hardtop, refer to pages 1.2, etc. of the 1974 Soft Trim Section A. As shown on page 1, Trim Code CB indicates (1) Body types (53B,65B). (2) Trim scheme description (Medium blue vinyl and medium blue cloth). (3) Door and Quarter material (swatch No.15), bolster material (swatch No.15), cushion and back material (swatch No.15 and 261) and headlining material (swatch No.13).

CODE	BODY TYPE	TRIM SCHEME	DOORS and QTR'S.	SEATS BOLSTER	SEATS CUSHION and BACK	HEADLINING
MERCURY (A)						
CA	53B,65B	Black vinyl and black cloth				
CB	53B,65B	Medium blue vinyl and medium	4	4	4 & 260	1
			15	15	15 & 261	13
					49 & 262	

How to use for 1975/: Identify Model, Body type and Trim Code and apply this information to listing of Trim Scheme Codes. (For material identification refer to Salesman's Color and Upholstery Guide).

For example:
To determine description of trim scheme and type of seat for Trim Code CB on a Mercury Four Door Pillared Hardtop, refer to pages 1.2, etc. of the 1975 Soft Trim Section A. As shown on page 1, Trim Code CB indicates (1) Body Types (53H,65H); (2) Trim scheme description (Medium blue vinyl and medium blue cloth); and (3) Type of seat (FW-Full width).

CODE(S)	BODY TYPE	TRIM SCHEME	●TYPE OF SEAT
MERCURY (A)			
CA	53H,65H	Black vinyl and black cloth	FW
CB	53H,65H	Medium blue vinyl and medium blue cloth	FW
	53H,65H		

SOFT TRIM PARTS FOR ALL MODELS

Consists of: (1) Parts cataloged by trim code and color (e.g. groups 02344-5, 62900, etc.).
(2) Parts cataloged by trim code only (e.g. groups 23942-3, 62900, etc.)
(3) Miscellaneous parts (e.g. groups 45422-3, 47042, etc.)

PARTS CATALOGED BY COLOR (EXCEPT CAPRI)

(1) Identify Model, Year, Body Type and Color of desired part. (2) Determine Group Number of part. (3) Locate appropriate Trim Code and Color listed at top of page. Second character of trim code generally applicable to each color is also shown above the color as an additional aid. When color of part is in doubt refer to the list of Trim Codes for further identification. (4) Match Color with Model and Body Type to select desired part number.

For example: Should a Blue cut pile Rear Floor Carpet, Group 13046) be desired for a 1975 Mercury Four Door Pillared Hardtop -
(1) Refer to Group 13046 in the 1975 Soft Trim Section A. (2) Read list of Colors above title to find Blue.
(3) Read down to find A(53)--cut pile. (4) Part number shown is D5MY 5313046 and suffix in "Blue" column is B.

COLORS →

	D5MY 6513046						D										

PARTS CATALOGED BY COLOR (CAPRI)

(1) Identify Body Type (1976 only) and Color of desired part. (2) Determine Group Number of part.
(3) Locate appropriate Trim Code and Color listed at top of page. First character of Trim Code generally applicable to each color is also shown above as an additional aid. When color of part is in doubt refer to the list of Trim Codes for further identifications. (4) Match Color with Body Type to select desired part number (1976 only).

For example. Should a Black Floor Carpet. (Group 13000-1) be desired for a 1976 with Decor Option -
(1) Refer to Group 13046 in the 1976 Soft Trim Section J. (2) Read list of Colors above title to find Black.
(3) Read down to find J(64P). (4) Part number shown is D5RY 6413000 and suffix in "Black" column is R.

SOFT TRIM PARTS FOR ALL MODELS- cont'd.

PARTS CATALOGED BY TRIM CODE

(1) Identify Model, Year, Body Type and Trim Code. (2) Determine Group Number of part. (3) Locate appropriate Trim Code (listing of Trim Codes precedes each Body Type). (4) Match Model and Body Type with Trim Code to select part number.

For example: Should a R.H. Rear Door Trim Panel, (Group 27406) be required for a 1975 Lincoln Four Door Pillared Hardtop, Trim Code BB -
(1) Refer to Group 27406 in the 1975 Soft Trim Section D. (2) Read down to locate D(53). (3) Read trim codes (listed alphabetically) to find Trim Code BB. (4) Part number shown is D5VY 5327406 and suffix listed is ABB.

BODY TYPE	R/L	PART NUMBER LESS SUFFIX	TRIM CODES AND APPLICABLE PART NUMBER SUFFIXES							
27406-7		PANEL ASSY. (REAR DOOR TRIM) cont'd.								
		TRIM CODES →	BA	BB	BD	BG	BJ	BU	BY

	L	D5VY 5327407	ABA	ABB	ABD	ABG	ABJ	ABU	ABY	

3 DIGIT TRIM CODES

Parts for 3 digit trim codes ending with an alphabet (e.g. BBA) are listed with parts cataloged by trim code. Parts for 3 digit trim codes ending with a numeral (e.g. BB1) normally are not cataloged. Refer to the listing of Trim Codes to determine which parts are available through service. For parts Which are not available for service contact your Service Representative, who will process in accordance with General ICC bulletin No. 7526.

1973 SOFT TRIM SCHEME CODES

AS LISTED ON CERTIFICATION LABEL

● For swatch identification, refer to Page B, etc.

A (MERCURY)

NOTE 1 For replacement of door and quarter trim panels (23942–3, 27406–7 and 31012–3) refer to this code in the 1973 Soft Trim Section. For replacement of cushion covers (62900 and 63804) and covers (64416 and 66600) contact your Service Rpresentative who will process in accordance with ICC bulletin No. 7526 All other parts are included in the 1973 Soft Trim Section.
